PROFILE

I am Chris, a detail-oriented and motivated Junior IT Web Developer, studied at James Cook University (JCU), Singapore. With a strong foundation in web development technologies and a passion for creating dynamic and user-friendly websites, experiences in front-end & back-end development, I have adept at collaborating with cross-functional teams to deliver high-quality solutions that meet client requirements.

WORK EXPERIENCE & PROJECTS

Best Oil Company (BOC), Myanmar
Web Development Intern   DEC 2022 - PRESENT

- **Responsibilities:** Assist in maintaining and upgrading the company's main website.
- **Technologies Used:** Work with HTML, CSS, Bootstrap and JavaScript to implement new features and resolve existing issues, ensuring a seamless user experience.
- **Achievements**: Contribute to the successful redesign of the company's main website, enhancing its aesthetic appeal and improving navigation.
- Here is the URL link clone project that I did for my company.

KMD   Dec 2021 - Nov 2022
Senior Instructor

- **Responsibilities:**
- **HTML** - Teaching students HTML, how to structure webpages including elements like heading, paragraphs, links, images forms and more
- **CSS** - Teaching students involved how to style HTML.
- **JavaScript** - Teaching JavaScript covers programming concepts such as variables, data types, functions, loops, conditions and objects.
- **Bootstrap** - Teaching student how to use a front-end frame work for faster and easier.

To continuously improve my skills , here is some of the projects that I have made.

- https://github.com/Yairhtet248/Move-It-service
- https://github.com/Yairhtet248/TinDog-Project
- https://github.com/Yairhtet248/Simon-Game-Project

JCUS 17th Convergence Conference (Projects)

1. Educational Mobile App (Mobile Computing):

- **Description:** Developed an educational app aimed at helping students learn and reinforce concepts in STEM (Science, Technology, Engineering, and Mathematics).
- **Features:** The app includes interactive lessons, quizzes, and flashcards designed to cater diverse learning styles. It offers immediate feedback to enhance understanding and track progress.
- **Technologies Used:** Utilized Java to build the app's user interface, and Firebase for real-time data storage, allowing users to save progress and sync between devices.
- **Achievements:** Successfully launched the app, receiving positive feedback from educators and students for its intuitive design and comprehensive coverage of STEM topics.

2. Multi-Disciplinary Project (MDP):

- **Description:** Participated in a multi-disciplinary project, collaborating with colleagues from various disciplines including marketing, design, and software engineering.
- **Responsibilities:** Led the web development team, implementing a responsive and dynamic website to showcase the project's goals and outcomes.
- **Technologies Used:** HTML, CSS, and JavaScript for front-end development, and integrated back-end functionality using Python and Django.
- **Achievements:** The website facilitated engagement from diverse stakeholders, achieving project goals on schedule, and showcasing effective cross-disciplinary collaboration.
